I’m Wonbeom Jang who like Computer Vision

Email: jtiger958@gmail.com
GitHub: https://github.com/wonbeomjang

Skills

Framework

PyTorch	★★★★☆	Free to use Implementing, learning a deep learning network that is presented in the paper.
LibTorch	★★☆☆☆	Available with the required are available Through PyTorch's C++ API, Deep Learning Project in Mobile Environment is carried out in the mobile environment.
OpenCV	★★☆☆☆	Available with the required are available

Language

Python, C, C++,	★★★☆☆	Able to learn the desired framework A number of project experiences. I can implement the functions you want and learn the frameworks you need
Swift, JAVA	★★☆☆☆	Understand simple code and write. Simple coding for using LibTorch in mobile environments.

Co-Work

Git, GitHub	High frequency of use

Experience

2019-08 ~ 2020-02

DeepPaperStudy, Deep Learning paper study club
Member

• Summary ESRGAN, ML-GCN, MobileNet etc.
https://github.com/DeepPaperStudy/DPS-4th

2019-04 ~ Current

Chung-Ang Univ. Computer Vision and Machine Learning Lab
Under graduated researcher

• Multi-view Depth Estimation
- Collected the real word dataset
- Analyzed problem of baseline network (DPSNet) and find improvements
- Test the improvement of devised network

• Single Image Super Resolution
- Analyzed problem of baseline network (ESRGAN, RankSRGAN) and find improvements
- Implement ESRGAN
- Implement the network envisioned.

2019-01 ~ 2019-02	**2019 Winter CLUG Opensource SW Camp** *Member* • Convenience store discount notification service - Develop android application
2018-09 ~ Current	**Prography** *Administrator* • Fashion Recommendation for mobile application - Implement basic classification network - Make bridge using Object-C to use pytorch in iOS device • Image style transfer - Implement CycleGAN - Implement image style transfer using CNN - Make python package to easy to update • Detect Food Ingredient for managing refrigerator - Implement and train SSDLite + MobileNetV2 - Make detection module using raspberry pi - Create deep learning server using AWS + Flask • Hair segmentation for mobile device - Implement HairMatteNet and custom loss

Education

2018-03 ~ Current	**Chung-Ang University, Computer Science and Engineering** • G.P.A: 4.46/4.5 | ranking: 1/199

Awards and Honors

2020-02-14	• Barrier Free App Development Contest *held by green light sponsored by Hyundai Autoever and the National Institute for Special Education* - Awarded the Encouragement Prize by creating 'Pharmacy Information Service for the Visually Impaired.' - Develop iOS Appication app store link: https://apps.apple.com/kr/app/집약/id1492914514 facebook link: https://www.facebook.com/zipyak/
